

M-A9

Listening
experience
without limits.

Elegant. Compact. And full of power.

The **M-A9** self-powered column speaker system has an elegant and unobtrusive design, providing **reliable and impressive performance** for low volume applications up to the highest output levels at small and medium-sized venues.

Ultimate experience

The column features twelve 3.5" low-mid drivers, six mid-range drivers, and a waveguide with four 0.5" compression drivers, ensuring consistent sound and precise coverage.

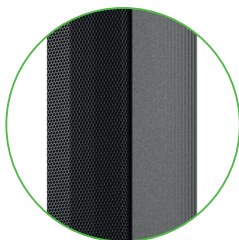

18" woofer

The subwoofer features a powerful 18" woofer in a vented, polyuria-coated plywood enclosure and serves as a stable base for the column.

By the way: The aluminum column is split into two parts for easy transportation.

Perfect column system

The M-A9 delivers incredible sound quality that your audience will simply love. The tweeters in combination with the multicell waveguide provide high intelligibility, while the extra 6pcs rear mid-range drivers ensure rich and beautiful vocals.

Powered by four amplifiers

The M-A9 column speaker system has four amplifiers and two SMPS on an aluminum heatsink for efficient cooling, with independent subwoofer control and DSP software managing all parameters, including unique low-noise converters.

Features that top the charts.

- ✓ Self-powered column system
- ✓ Plug & Play setup
- ✓ Bluetooth® audio streaming
- ✓ Bluetooth® True Wireless Stereo (TWS)
- ✓ Multicell waveguide, optimized for near and far field
- ✓ Low noise digital signal processing
- ✓ Aluminium column housing
- ✓ Double SMPS, running in optimized phase mode for exceptional stability
- ✓ Polyurea coated plywood subwoofer cabinet
- ✓ Multi-driver setup in (double)-columns

Your Event Your Style

A large crowd of people is shown from behind, with their arms raised in the air, suggesting a concert or festival. The background is a bright, clear blue sky. The overall mood is energetic and celebratory.

Dual-Mode Flight Case:

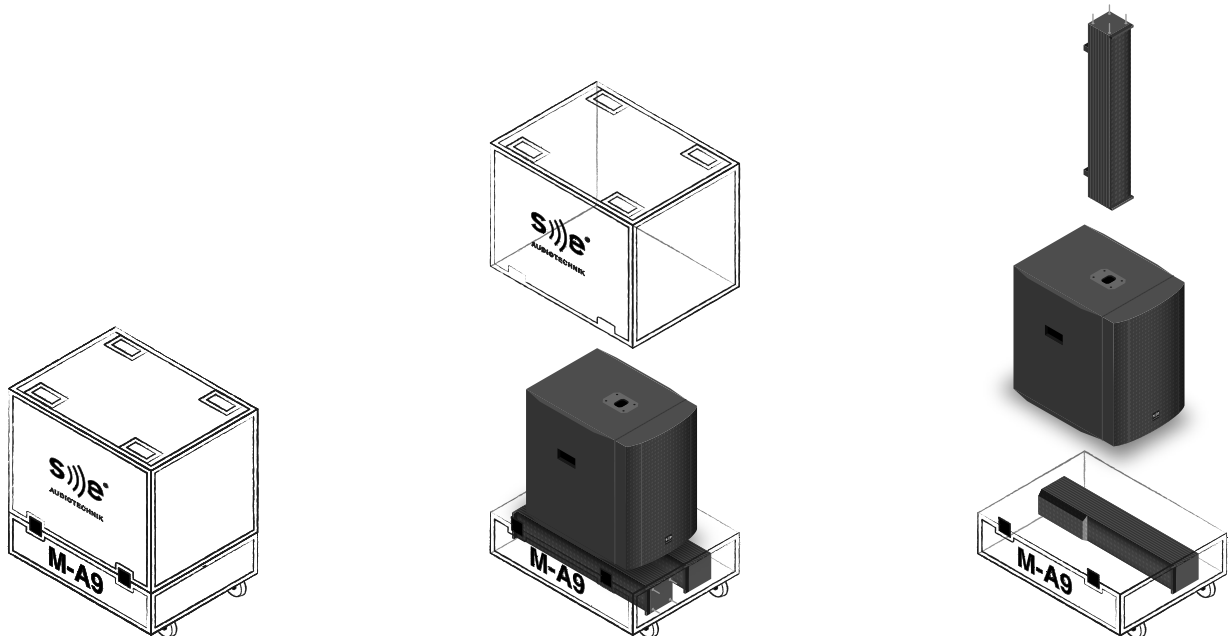

Transport & Work

Our clever flight case (FC) has two fantastic modes to make life easier for you. In Transportation Mode, the FC provides rock-solid protection, ensuring your system arrives in perfect condition wherever your events may take you. Switch to Work Mode by keeping the lower part of the case under the M-A9. This unique feature transforms the case into a handy transport dolly, lifting the system for improved mobility and easy positioning.

So simple. Yet so effective.

Optimized for Mobility

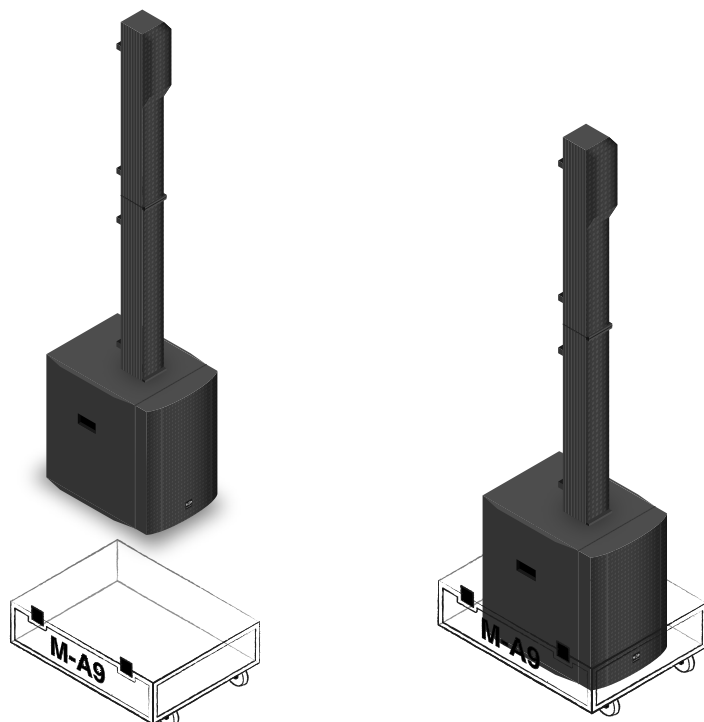

3...2...1...GO. The M-A9 column speaker system is designed with mobility and flexibility in mind. Ideal for mobile applications and live events. Each system comes packaged with a custom flight case that supports both transportation and operation, ensuring your setup is always ready to go.

The dual-mode flight case is part of the system, so you'll have everything you need to get off to a great start.

The subwoofer and the columns are safely tucked away, ready for when you need them.

The system is so easy to put together and set up, even one person alone can do it.

You can put the flight case away until the show is over or ...

... you build the M-A9 system on the lower part of the flight case. This makes the system flexible and easy to move.

The perfect sound system which requires only one person to set up.

Discover the **advantages** of the **M-A9.**

Plug & Play

All you need is a power cable and a wired or Bluetooth® audio signal.

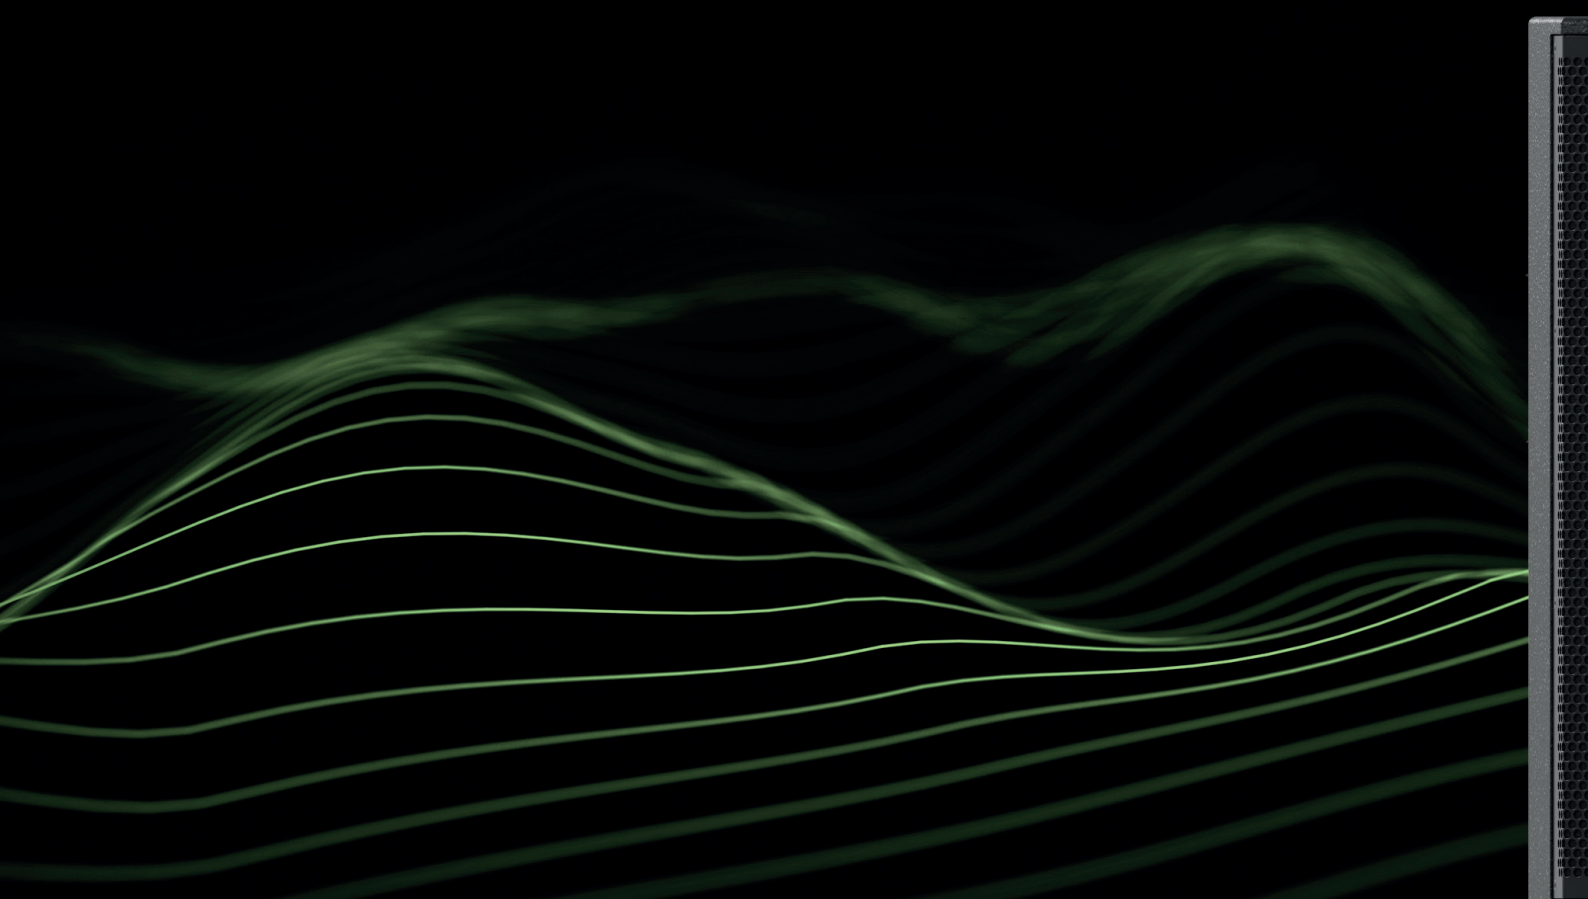

Absolutely flexible

You can use the M-A9 in mono or stereo (TWS) and move it around the room even after assembly.

One person is enough

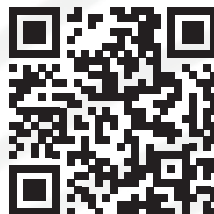

You can easily set up and operate the system on your own.

M-A9 means:

- ✓ Only a few cables are required
- ✓ Just one flight case for a mono system and two for a stereo system
- ✓ Super short set up time
- ✓ No time alignment between subwoofer and columns necessary
- ✓ Homogeneous directivity behavior
- ✓ True multi-way full-range system
- ✓ Even coverage of near, mid, and far field
- ✓ Perfectly tuned sound characteristics across the entire frequency range
- ✓ Consistent high speech intelligibility
- ✓ Easy handling
- ✓ Easy to configure
- ✓ No need for external amplifiers or additional speakers
- ✓ Beautiful design and elegant appearance
- ✓ Cost effective and high ROI
