

M-F3A PRO
goes **MAX.**

AUDIOTECHNIK

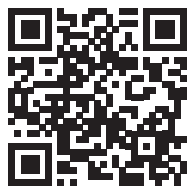

M-F3A PRO MAX

MAXimally rethought.

More power, more range – and still simple, compact, and modular. For those who want the unparalleled **M-Line** signature sound for larger tasks.

MAX-Quality, MAX-Sound.

max.se-audiotechnik.de/en/

Sound that sets standards.

The hornless design ensures clear, natural playback with fine detail, harmonious mids, and powerful highs – from subtle background music to robust live shows.

Thanks to its compact design and integrated three-point rigging system, the **M-F3A PRO MAX line array** can be used as a ground stack or flown system - mobile or permanently installed.

MAXimized features.

Far-reaching performance

The M-F3A PRO MAX offers impressive acoustic performance with precise sound projection and stable directivity over long distances.

Loud and clear

Clear, powerful, present – even at high volumes, the sound remains natural with unmatched speech intelligibility.

Effective Class-D power

Efficient amplifiers, integrated signal processors, and a finely tuned speaker design ensure dynamics, transparency, and reliability.

MAXimum sound.

Minimal size.

The **M-F3A PRO MAX line array** delivers rich, characteristic sound with homogeneous dispersion - in minimal size and with maximum flexibility.

The **M-F3A PRO MAX** features the outstanding and unique properties of the **M-F3A PRO line array** and effortlessly handles larger tasks. Together, both systems make the **M-Line** even more comprehensive.

live now.

M-F3A PRO MAX

High playback levels and long range

Suitable for medium to
large applications

16 × 2.8" midrange drivers

8 × 1" tweeter

12.6 kg

1,000 W (2 × 500 W RMS) Class-D

Ground stack with B-Line subwoofers

Bass extension with
flyable subwoofer B 15A FS

Bass array extension (cardioid and
end-fire) with B-Line subwoofers

Ready to use immediately.

Thanks to Plug & Play, the **M-F3A PRO MAX** system is ready for immediate use. No matter the environment – the **M-F3A PRO MAX line array** is easy to operate and quickly delivers a first-class sound experience. With just two controls, the system can be optimally adjusted to meet any challenge.

- 1 Connect power cable
- 2 Connect audio cables
- 3 Switch on
- 4 Select number of units
- 5 Set volume

Easily Expandable.

The **M-F3A PRO MAX line array** system is modular and scalable. Whether for smaller groups or a large crowd – the system adapts to any requirement. The **M-F3A PRO MAX** modules can be easily combined with B-Line subwoofers, creating ideal conditions for larger setups and demanding tasks.

From small groups...

...to thousands of listeners.

B-Line

Our Subwoofer for even more Bass.

Good sound needs a powerful foundation. But every application is different and needs to have its own sound solution.

That's why we developed the **B-Line** into one of the most comprehensive and versatile subwoofer series on the market. If Cardioid- or End-Fire Setup, if installation or mobile sound system, if stacked on the floor or flown in an array – the **B-Line** ensures the right **Boooooom**.

15" – The Space Miracle

The most outstanding feature of the models with a **15" woofer** is their easy handling during setup and transport in combination with the impressive output power during operation. Note that this **15" sub-woofer** is also available as a flyable version. So you also have plenty of bass in a flown system.

Size	15"
Vocal coil	3"
Max. SPL	bis zu 136 dB
Load capacity (Passive)	1,600 W peak
Power (Self-powered)	800 Watt Class-D Amp

18" – The Golden Mean

The **18" woofer**, in conjunction with the powerful **4" voice coil**, delivers up to **138 dB max SPL** and **ranges down to 29 Hz**. The passive B 18 is rated at **2,400 W (peak)**, while the self-powered subwoofers are driven by a **1,600 W Class-D amp**. To transport and set up the basses in a quick and safe way anyway, there are two ergonomically optimized handles on each side.

Size	18"
Vocal coil	4"
Max. SPL	bis zu 138 dB
Load capacity (Passive)	2,400 W peak
Power (Self-powered)	1,600 Watt Class-D Amp

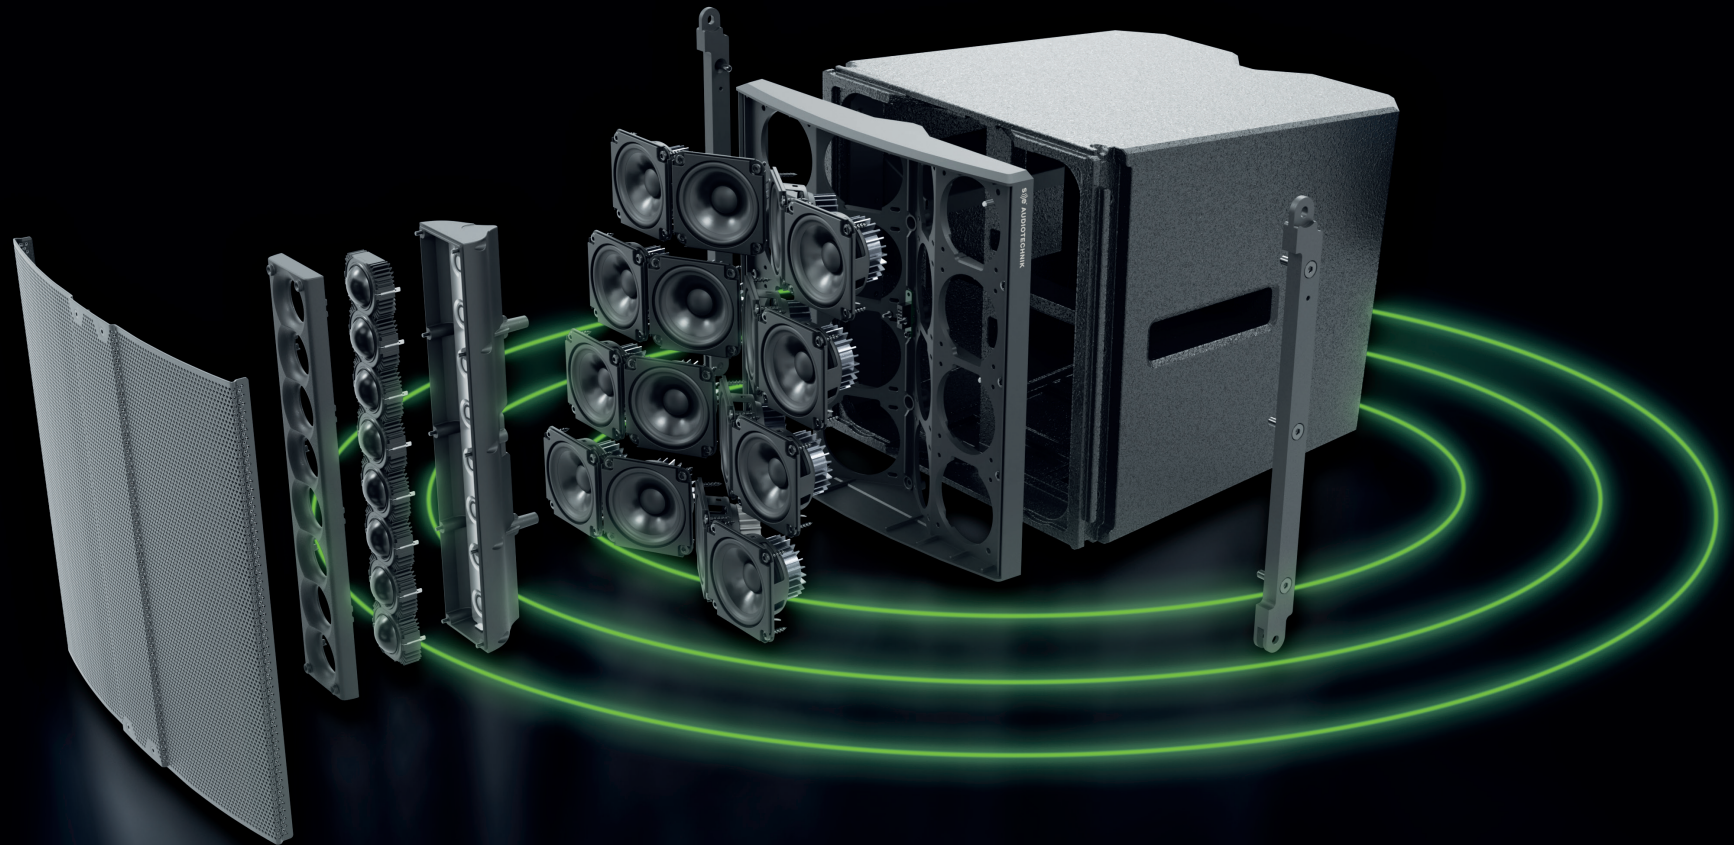

21" – The Full Load

The massive **21" driver** with its powerful **5" voice coil** thunders with **up to 142 dB max. SPL** down to the deepest depths – **from 25 Hz** it is the bass instance in our line-up. Powerful up to **4,000 W (peak)**, it delivers enough power for any stage and any event. Despite the higher weight, it is easy to maneuver thanks to the **two well-positioned recessed grips** on both sides.

Size	21"
Vocal coil	5"
Max. SPL	bis zu 142 dB
Load capacity (Passive)	4,000 W peak
Power (Self-powered)	1,600 Watt Class-D Amp

MAXimize your sound.
